Its primary objective is to ensure that tests are performed consistently, reliably, and scientifically validated to minimize false positives and negatives. The manual emphasizes the importance of proper training, standardized procedures, and accurate documentation.

Key Objectives of the Manual

- Establish uniform procedures for conducting sobriety tests
- Improve the accuracy of impairment assessments
- Reduce racial and ethnic disparities in DUI enforcement
- Incorporate scientific research into testing protocols
- Provide guidance on legal considerations and documentation

Who Should Use the Manual?

The manual is intended for law enforcement officers, DUI prosecutors, forensic specialists, and trainers involved in roadside impairment assessments. It also serves as an educational resource for legal professionals and the general public seeking to understand how sobriety testing works.

The Core Field Sobriety Tests Outlined in the Manual

The 2013 manual primarily details three standardized tests, which have become the cornerstone of roadside impairment assessments. These tests are designed to evaluate clues associated with alcohol or drug impairment through observable and measurable behaviors.

- Horizontal Gaze Nystagmus (HGN)

Overview

HGN is the involuntary jerking of the eyes as they follow a moving object. The test assesses the presence and intensity of nystagmus at various angles, which correlates with blood alcohol concentration (BAC) levels.

Procedure

- The officer asks the suspect to follow a stimulus (usually a pen or small flashlight) with their eyes
- The stimulus is moved horizontally across the suspect's field of vision
- The officer observes the suspect's eyes for specific clues at designated angles

Clues Assessed

- Lack of smooth pursuit
- Distinct and sustained nystagmus at maximum deviation
- Onset of nystagmus prior to 45 degrees

Scientific Basis and Validation

The manual emphasizes the empirical validation of HGN as a predictive indicator of impairment, supported by laboratory research.

- Walk-and-Turn (WAT)

Overview

The Walk-and-Turn test evaluates the suspect's ability to perform divided attention tasks, balance, and coordination.

Procedure

- The suspect is instructed to stand heel-to-toe along a straight line
- They are asked to take nine steps, heel-to-toe, along the line
- Then, they turn on one foot and take nine steps back in the same manner

Clues Assessed

- Failure to maintain heel-to-toe position
- Missed steps or steps outside the line
- Starting too soon or stopping during the test
- Not counting steps correctly
- Using arms for balance
- Improper turn

Performance Criteria

The manual lists specific clues that officers are trained to observe, with a focus on standardized instructions and scoring.

- One-Leg Stand (OLS)

Overview

This test assesses balance and divided attention by asking the suspect to stand on one leg.

Procedure

- The suspect is instructed to stand with one foot about six inches off the ground
- They are asked to hold the position and count aloud (e.g., "one thousand and one") for about 30 seconds

Clues Assessed

- Swaying while balancing
- Using arms for balance

- Hopping or putting foot down before completion
- Incorrect counting

Scoring

The number of clues observed helps determine the likelihood of impairment.

Training and Standardization Emphasized in the Manual

The 2013 manual underscores the importance of comprehensive officer training to ensure the tests are administered correctly and consistently. Proper training enhances the reliability of the tests and minimizes challenges in court.

Components of Effective Training

- Understanding the science behind each test
- Mastering standardized instructions and procedures
- Recognizing clues accurately
- Documenting observations meticulously
- Addressing common challenges and errors

Certification and Recertification

Officers are encouraged to undergo initial certification and periodic recertification to maintain proficiency. The manual details the training curriculum, including practical demonstrations and assessments.

Legal and Scientific Considerations

The manual discusses the scientific validity of the tests, as well as legal issues surrounding their use.

Scientific Validation

- The tests have been validated through laboratory and field studies
- They are most effective when combined with other evidence, such as chemical tests
- Limitations are acknowledged, especially concerning individuals with medical conditions or certain disabilities

Legal Aspects

- Proper administration and documentation are crucial for admissibility in court
- Officers must follow standardized procedures precisely
- The manual advises on handling challenges and cross-examinations related to the tests

Common Criticisms and Limitations Addressed in the Manual

Despite widespread use, the manual recognizes certain limitations of field sobriety tests:

- Not suitable for individuals with physical disabilities, injuries, or medical conditions
- Environmental factors such as poor lighting, weather, or uneven surfaces can affect performance
- Nervousness or anxiety may influence results
- Cultural or language differences can impact understanding and execution

The manual emphasizes that sobriety tests are tools to assist, not definitive proof of impairment, and should be used in conjunction with chemical testing.

Enhancements and Updates in the 2013 Manual

Compared to previous versions, the 2013 manual incorporates several improvements:

- Clarification of procedures based on latest research
- Inclusion of new photographs and diagrams for clarity
- Updated guidance on handling special populations
- Emphasis on scientific validation and error reduction
- Enhanced training modules and testing protocols

Conclusion

The NHTSA Field Sobriety Test Manual 2013 remains a foundational resource for law enforcement agencies aiming to accurately and fairly assess impairment at roadside. Its emphasis on standardized procedures, scientific validation, and comprehensive training helps ensure that sobriety tests serve as reliable indicators of impairment, thereby supporting justice and public safety.
