3. Inscribed and Central Angles

- Central angle: An angle with its vertex at the circle's center, intercepting an arc.
- Inscribed angle: An angle with its vertex on the circle, intercepting an arc.

Significant theorems:

- The measure of a central angle equals the measure of its intercepted arc.
- The measure of an inscribed angle is half the measure of its intercepted arc.

4. Arcs and Their Measures

- Major and minor arcs: Parts of the circle between two points, with measures greater than 180° or less.
