Sample Probability Practice Question for 8th Grade STAAR

To illustrate, here's an example of a typical practice question:

Question:

A bag contains 3 red marbles, 2 blue marbles, and 5 green marbles. If a marble is randomly selected, what is the probability that it is not green?

Solution:

Total marbles = $3 + 2 + 5 = 10$

Number of non-green marbles = $3 + 2 = 5$

Probability = Number of favorable outcomes / Total outcomes = $5/10 = 1/2$ or 50%

This type of question can be found on practice sheets to help students understand and apply probability concepts.
