Printable Origami Balloon Instructions: Step-by-Step Guide

Below is a detailed, printable set of instructions to create an origami balloon. To enhance clarity, these steps are complemented by diagrams, which can be included in your printable version.

Step 1: Prepare Your Square Paper

- Start with a perfect square piece of paper. If using non-square paper, cut it into a square.
- Place the paper colored side down if using colored paper, so the final model shows the colored surface.

Step 2: Fold Diagonally in Both Directions

- Fold the paper diagonally from corner to corner to form a triangle.
- Crease well and unfold.
- Repeat for the other diagonal.
- These creases will serve as guides for subsequent folds.

Step 3: Fold in Half Horizontally and Vertically

- Fold the paper in half from top to bottom.
- Crease well and unfold.

- Fold in half from side to side.

- Crease and unfold.

Step 4: Fold into a Preliminary Square Base

- Collapse the paper into a square by bringing the four corners toward the center, using the creases as guides. This is called the 'preliminary base' or 'waterbomb base.'

- To do this, bring two opposite corners together, then flatten.

Step 5: Form the Square Shape

- With the preliminary base folded, ensure all creases are firm.

- The model should now resemble a flattened square with open flaps.

Step 6: Fold Flaps to Form Pockets

- Take the top layers of the right and left corners of the square and fold them towards the center line, creating a kite shape.

- Crease well.

- Repeat on the other side.

Step 7: Fold the Top and Bottom Edges

- Fold the top and bottom edges of the model inward to meet at the centerline, creating a narrower shape.

- Crease firmly.

Step 8: Form the Puffed Shape

- Turn the model over and repeat similar folds on the other side if necessary, ensuring symmetry.
- Carefully push the model inward to form a puffed, cube-like shape. This is where the balloon effect begins to take shape.

Step 9: Create the Opening for Blowing

- Locate the small opening or flap at the end of the model.
- Slightly unfold or loosen this flap to allow for blowing air into the model.

Step 10: Inflate the Balloon

- Blow gently into the opening to puff up the model, giving it a rounded, balloon-like appearance.
- Do not overinflate to avoid tearing.

Final Touches

- Adjust folds as needed to make the shape even.
- Ensure the opening is small enough to hold the air without leaking.
