- Game Play:
 - The teacher or student selects a goat figurine and a number card.
 - They count out loud to match the number with counters.
 - The child then decides whether their goat can cross based on the number (e.g., "Can the goat with 3 go across?").
 - The activity can be extended by asking questions like "Which goat has more?" or "Which has fewer?"
- Variation:
 - Incorporate addition/subtraction by asking, "If one more goat joins, how many are there now?"
 - Use the activity to introduce simple comparisons: "Is this goat's number less than or greater

than that one?"

Educational Benefits

- Reinforces counting skills and number recognition
- Introduces comparison concepts (more/less)
- Develops turn-taking and social interaction
- Encourages verbalization of mathematical thinking

Assessment and Adaptation

This activity can be adapted for various skill levels by adjusting the number range or complexity of questions. Teachers can observe children's ability to count, compare, and articulate their reasoning.
